

Wireless Vehicle Detector "Puck"

Wireless Easy Exit Device

Made in
USA

GLOBAL
ACCESS

Wireless free exit system can be mounted to posts or objects for easy installation.

The Puck is powered by two CR123A - 6V Batteries.

Sealed casing provides 1-3 years of battery life.

Compatible with all operators via wireless receiver connected to control board.

Adjustable sensitivity levels: High, Medium, and Low.

Ideal for placement in the middle of a driveway for optimal detection.

No trenching required, offering flexible installation options.

Can be mounted to an object or submerged just below the surface.

Sensor "Puck"

Self-contained unit with sensor, transmitter, and antenna

Integrator

Relay contact connects to any security/home automation system or gate operator

Auger Screws (2)

Holds sensor puck in ground or gate operator

Batteries (2 - CR123A)

With battery terminal clips

Coaxial Cable (optional)

Use this when connecting to included antenna when externalizing it with sealed metal gate operator.

CW-REP REPEATER

Turn any additional Integrator into a repeater. Install in window closest to sensor, extending radio range.

The use of safety devices is strongly advised

ARMAS Compact Photo Beams

Wireless/Wired
Plastic or Metal Anti Vandal
#1059-0050

Power Supply	Stand-by Current	Alarm Current	Estimated Battery Life	Use Frequency	IP
2 x CR123A Batteries (6V)	22 Microamps	130 Milliamps	1-3 Years	Max 350 Cycles/day	IP68

CW-SEN Additional Wireless Exit Puck

Additional sensor for wide (20 feet) or multiple driveways, when using the CW-SYS Wireless Exit Puck

#1018-0221

Standard Application Example

ON AN OBJECT

IN THE GROUND

IN THE DRIVEWAY
